

BROADLANDS PUBLIC SCHOOL

NITWITS LICE PREVENTION PARTICIPATION

Head lice are a concern of many parents of school-aged children. The most common places for children to come into contact with head lice are schools, sleepovers, playgrounds, or sporting events. Infestations can happen easily when children are playing together.

Three years ago, we introduced a proactive lice check program for all students at Broadlands. Certified professionals from Nitwits Lice Removal Team came to the school and spent approximately five minutes with every student, thoroughly checking for lice. They returned to check any children who were absent on the check day and even checked children who had previously been treated for lice.

For more information about lice or the Nitwits School Lice Check program, please visit our website at www.broadlandssac.com.

The program will continue this year, with three lice checks already scheduled in the fall, winter and spring. **The total cost for all three lice checks is \$5.00 per student. Payment is voluntary**, but is very much appreciated and would help SAC cover the costs of this proactive lice program. Regardless of payment, all students at Broadlands will be checked for lice during these scheduled checks, unless a parent indicates they wish to opt out.

Thank you.
